EDUCATION

Higher National Diploma in Information Technology (HNDIT)

SLIATE, Kandy - Sri Lanka Institute of Advanced Technological Education

GPA: 3.82 / 4.00

2022 – 2025

TECHNICAL SKILLS

Languages

PHP · TypeScript · JavaScript · Java · Dart

Frontend

React · Vue.js · HTML5 · CSS3 · Bootstrap

Backend

Laravel · CodeIgniter · Node.js · REST APIs

Database

MySQL · Firebase · Schema Design ·

Stored Procedures

Tools & Deployment

Git/GitHub · Postman · phpMyAdmin ·

FTP/SFTP · Vercel

Practices

Agile/Scrum · MVC · OOP · Code Review

CERTIFICATIONS

Database Management - MySQL

LK Domain Registry · 2025

Front-End Web Development

University of Moratuwa (CODL) · 2024

Introduction to Java

Sololearn · 2024

LANGUAGES

Sinhala - Native

English - Professional Working Proficiency

HASHAN JAYASUNDARA

FULL STACK SOFTWARE DEVELOPER

2+ Years Experience

PROFESSIONAL SUMMARY

Full Stack Software Developer with 2+ years of experience building and shipping production web applications across the entire stack, from relational database design to responsive front-end interfaces. Delivers REST APIs and full-featured modules for enterprise ERP, distribution, and inventory management systems using **Laravel, Vue.js, React, and MySQL**, with direct ownership of **database** performance, live deployment, and production support. Comfortable working across **PHP** and **TypeScript** codebases and translating business requirements into clean, maintainable code within Agile teams. **HNDIT** graduate (**GPA 3.82/4.00**) with a growing portfolio of independent projects spanning AI-assisted tooling, automation utilities, and cross-platform mobile applications.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer - Soft-Master Technologies (Pvt.) Ltd.

Kandy, Sri Lanka

July 2024 – Present

- ▶ **Full-stack module development:** Build and maintain features for enterprise ERP, distribution management, and inventory/electronics management systems using Laravel and PHP on the backend with React and Vue.js on the front end.
- ▶ **API engineering:** Design and implement RESTful APIs consumed by multiple internal applications, handling authentication, validation, and structured error handling for production-grade reliability.
- ▶ **Database architecture:** Design and optimize MySQL schemas, write stored procedures, and tune queries to improve reporting and transaction performance across high-traffic modules.
- ▶ **Production support:** Diagnose and resolve live production issues under time pressure, coordinating with QA and business stakeholders to restore service and prevent recurrence.
- ▶ **Release management:** Own end-to-end feature delivery from requirement clarification through development, testing, and deployment, using FTP/SFTP workflows for live server releases.
- ▶ **Agile collaboration:** Participate in sprint planning, peer code reviews, and daily stand-ups, and author technical documentation to support onboarding and release handoffs.

KEY PROJECTS

AI Video Watermark Remover - React, TypeScript, AI

Browser-based tool that applies AI-driven video processing to detect and remove watermarks from uploaded videos, with a React/TypeScript interface for upload, preview, and export.

Excel to SQL Converter - React, TypeScript

Web utility that parses uploaded Excel spreadsheets and automatically generates the corresponding SQL schema and insert statements, cutting manual data-entry time for database seeding.

NoteUnity - Student Note-Sharing App - Flutter, Firebase, Dart

Cross-platform mobile app that lets students upload, browse, and download lecture notes, with real-time Firebase sync, secure authentication, and category-based discovery.

Prompt Translator AI - *Vue.js*

Vue.js application that translates natural-language prompts between languages for AI tools, streamlining prompt-engineering workflows for non-English-speaking users.

Leeds Salon Website - *React, JavaScript*

Responsive, mobile-first business website for a local-based hair salon, covering service listings and booking information, deployed live on Vercel.

LEADERSHIP & ACTIVITIES

Event Coordinator | TECHFUSION Hardware & Software Workshop

SLIATE Kandy - 2023

- Directed end-to-end event coordination - budget, logistics, and venue setup - for a campus-wide technology workshop, and led a cross-functional volunteer team through flawless execution of technical sessions and live demos.
